Subject: Reclamation Surety Required, Staker Parson Companies, Heber Binggeli Quarry, M/051/0015, Wasatch County, Utah

Dear Mr. Dalley:

On April 15, 2013, the Division of Oil, Gas and Mining received a project map for the reference mine. The map shows 145 acres of proposed disturbance. This site was an existing sand and gravel operation, and this accounts for most of the disturbance. The Division has received a proposal to mine into the bedrock south of the existing sand and gravel operation, and as required by rule, a surety bond is required. Based on 2013 average costs for reclaiming small mines, the required surety is \$1,406,500.00. This estimate includes facilities that would require demolition prior to regrading and revegetation of the site for a post mining land use.

**Please submit the reclamation surety and reclamation contract by May 22, 2013.**

Please submit the Notice of Intention to Commence Large Mining Operations by October 15, 2013. No mining related disturbance may be created in bedrock until the surety is received and approved and you have received written acceptance from this office as well as other applicable agencies.

The reclamation surety can be submitted in one of several forms, including, an irrevocable letter of credit, a certificate of deposit, cash or a surety bond. Please contact Penny Berry at 801-538-5291 or by e mail at [pennyberry@utah.gov](mailto:pennyberry@utah.gov) for assistance in completing this requirement.
